About Us

Here is what our website says:

About Us

Here is what our website says:

> *Dev Club is a student group that tries to innovate and foster technical activities, and create a coding culture which is somewhat missing.*

About Us

Here is what our website says:

> *Dev Club is a student group that tries to innovate and foster technical activities, and create a coding culture which is somewhat missing.*

We develop cool stuff that benefits everyone in the campus.

- SenData
- Our own Website

Outline

What is Software Development?

Here is what wikipedia says:

What is Software Development?

Here is what wikipedia says:

> *Software development is the process of computer programming, documenting, testing, and bug fixing involved in creating and maintaining applications and frameworks resulting in a software product.*

What is Software Development?

Here is what wikipedia says:

> *Software development is the process of computer programming, documenting, testing, and bug fixing involved in creating and maintaining applications and frameworks resulting in a software product.*

Why is it useful?

What is Software Development?

Here is what wikipedia says:

> *Software development is the process of computer programming, documenting, testing, and bug fixing involved in creating and maintaining applications and frameworks resulting in a software product.*

Why is it useful?

- You will become a better, more efficient, and less error-prone coder.

What is Software Development?

Here is what wikipedia says:

> *Software development is the process of computer programming, documenting, testing, and bug fixing involved in creating and maintaining applications and frameworks resulting in a software product.*

Why is it useful?

- You will become a better, more efficient, and less error-prone coder.
- Necessary for a lot of coding jobs and something that is NOT taught in college

What is Software Development?

Here is what wikipedia says:

> *Software development is the process of computer programming, documenting, testing, and bug fixing involved in creating and maintaining applications and frameworks resulting in a software product.*

Why is it useful?

- You will become a better, more efficient, and less error-prone coder.
- Necessary for a lot of coding jobs and something that is NOT taught in college
- You win prizes and trips to places around the world as you compete with and meet other motivated and smart students.

Pre-requisites

Here are some pre requisites:

Pre-requisites

Here are some pre requisites:

- Language basic of either C++, Java or Python.

Pre-requisites

Here are some pre requisites:

- Language basic of either C++, Java or Python.
- Ability to read documentations effeciently.

Pre-requisites

Here are some pre requisites:

- Language basic of either C++, Java or Python.
- Ability to read documentations effeciently.
- Able to do a good GOOGLE Search !!

  And most importantly,

- Perseverance

Outline

What Can we learn?

- Making **best UI/UX** using angular, react, bootstrap, etc.

What Can we learn?

- Making **best UI/UX** using angular, react, bootstrap, etc.
- **Server side management** : Docker, Resource management, Sandboxing, Monitoring, etc.

What Can we learn?

- Making **best UI/UX** using angular, react, bootstrap, etc.
- **Server side management** : Docker, Resource management, Sandboxing, Monitoring, etc.
- **Back end** : Node.js, Django, Rust, Scala, Julia....

What Can we learn?

- Making **best UI/UX** using angular, react, bootstrap, etc.
- **Server side management** : Docker, Resource management, Sandboxing, Monitoring, etc.
- **Back end** : Node.js, Django, Rust, Scala, Julia....
- **Tools** : Git, Slack, IRC, Database (SQL, NoSQL ..)..

What Can we learn?
